

LNADA Follow-up Training Workshop

Day 1 – Session 1: Recap & Progress Review

27 May 2026 | Lao Statistics Bureau

Welcome back – the 3rd mission

- **Workshop:** LNADA Follow-up Training
- **Dates:** 27–28 May 2026
- **Trainer:** Frank Lieber – 686 Limited
- **Counterparts:** Mr. Saysoth Keodouangsinh, Mr. Vongthasone Vilaythong

This is **not** foundational training – it builds on February's. The focus is **customisation** and **applied restoration**.

What you learned in February – quick refresh

- The metadata standards underpinning LNADA
- The Metadata Editor as the authoring tool
- The LNADA catalog as the publishing destination
- The eight data types and the publishing workflow

If anything here feels unfamiliar, flag it now – we'll lend you the February deck during a break.

Practice since February – round-robin

Each of you, briefly:

1. **What** did you use the Metadata Editor for since February?
2. **What** worked smoothly?
3. **What** is one open question you brought to this workshop?

A challenging few months – context for this workshop

Since February, LSB has worked through a difficult period for the data catalog. The metadata recovery work has been intensive.

This workshop turns that work into something usable: **agreed templates, Lao translations, and restored datasets.**

What this workshop must deliver

Output

1: Customised LSB **microdata** + **document** templates

2: Adopt the international **indicator** template

3: **Lao translations** of the customised templates

4: **3–5 LSB datasets** restored to publication quality

By 16:00 Thursday, we walk out with these signed.

Two-day agenda

	Day 1 (Wed)	Day 2 (Thu)
09:00–10:20	Recap & progress	Lao translation review
10:40–12:00	Dataset review	Restoration walkthrough
13:30–14:45	Microdata template	Restoration hands-on (13:00)
15:00–16:00	Document template + sign-off	Wrap-up (14:15)

Day 1 = decisions. Day 2 = execution.

Who does what this week

- **Statistics editors** — lead the template field decisions and the Lao terminology review
- **Data integration & dissemination staff** — lead the dataset restoration
- **IT consultants & Trainer** — facilitates and drives the demo

One team, three roles.

Open the floor

What's on your mind before we move to the dataset review?

Next: **Session 2 – Dataset review & restoration scope (10:40)**
